

"SUPERSESSION"

Change first paragraph, page 4, to read:

"SUPERSESSION - This Directive supersedes Director of Central Intelligence Directive No. 1/16, "Security of Foreign Intelligence in Automated Data Processing Systems and Networks," effective \_\_\_\_\_ [~~-and-all-exisiting-directives,~~  
~~regulations, and other documents referencing the superseded~~  
~~Directive~~]."

RATIONALE: Accuracy - a number of other documents with different scope and applicability reference DCID 1/16, including our own DoD Directive 5200.28. Such documents may not be superseded by the new 1/16, although clearly the references should be updated to reflect the new version, and where appropriate, the policy provisions rendered consistent with the new DCI Directive.

On file OSD release instructions apply.
